

2nd JOINT CONGRESS for CERAMIC IMPLANTOLOGY

October 14 – 15, 2022
Kreuzlingen | Switzerland

ALL IN FOR CERAMIC

The largest congress of its kind

Many reasons why you should be
at the JCCI 2022

Dear Colleagues and Congress Participants,

With only three months of preparation, we established the 1st JCCI in October 2021 as the largest congress of its kind with over 300 participants from 17 nations and 4 continents. As acting president of ISMI e.V. (International Society for Metalfree Implantology) I invite you to the next JOINT CONGRESS 2022! Already today (as of February 2022), more than 96% of all tickets for in-person seats have been sold. We have already been able to sign up spectacular speakers and will have the „Big 5“ of the ceramic implant industry as well as further innovative companies as exhibitors and contributors joining us. Further scholarly organizations will still confirm their participation in the coming weeks and we expect well over 500 participants for the 2nd JCCI on October 14 and 15, 2022! „Many roads lead to Rome“ - and thus to ceramic implantology. However with this unique congress, we want to create a platform that not only allows but encourages different paths.

Cordially yours, Dr. Karl Ulrich Volz
President ISMI e.V., Congress Director JCCI

What visitors say about the last JCCI

BEATA BOHNERT *Schwaigern, Germany*

"I'm delighted that people are also coming from such different continents to share their experiences with us. It's fantastic how the world belongs together and how they're all going in one direction."

DR. JUSTIN PONQUINETTE *Tinton Falls, NY USA*

"The congress was incredible. The presenters did a wonderful job of opening my mind to what is possible and what is to come in the field of biologic dentistry."

DR. MUHAMMET EKMIN AKSAN *Istanbul, Turkey*

"It is a great honor and pleasure to be here. There are some great dentists here and the lectures are perfect. We have learned so much here. This is the future. Biologic dentistry is the best and most effective way for our patients."

DR. CLAUDIO FERRARO *Böhl, Switzerland*

"It was a great atmosphere, a great conference, really nice panelists, especially for somebody like me who comes from the manufacturing part of the ceramic implant industry. I like the holistic approach of how important it is to maintain a healthy diet and to have the right amount of nutrients, and how this contributes to the healing process."

Dr. Percy Marshall
Team Physician RED BULL LEIPZIG

And this is what our visitors say about the speakers from 2021:

MAARTJE BRANDS *Amsterdam, Niederlande*

"I am very happy to participate live! There are such good speakers here with great stories, just a good line up which is really entertaining to watch. There is a wide range of topics, basically everything is here. The congress is a lot of fun and it really feels like coming home."

DR. DOMINIK SCHULZE *Donaustauf, Deutschland*

"I think it's great and interesting that the congress is very complex and covers so many topics. There are great international speakers, so not only people from the region, but from India to Brazil, everybody is represented."

DR. JAN KLAPP *Düsseldorf, Deutschland*

"Super! Really great speakers. The constellation is super. Quite different levels, both medical and dental, regarding ceramic implants or even the entire lifestyle and one or the other approach on how to implement the overall concept, yes super. So I am very satisfied."

DR. CORBIN POPP *Denver, CO USA*

"The line-up of speakers was phenomenal. They're giants. Each one of these presenters this year are giants in their fields, and we had, you know, doctors, therapists and lab techs, dentists, surgeons...What can I say? Very, very high caliber."

High Tech for High Reach

Outstanding technology for an optimal 360° experience

With over 4,000 participants per year, the SBE (SWISS BIOHEALTH EDUCATION CENTER) is not only a leader in the German-speaking world in quantity, but also especially in quality. For more than 10 years, this center has been continuously improved and extended with important features. What the SBE is able to do, no other center and certainly not a variable congress hall in a hotel can do,

because here all technical, organizational and personnel elements are installed and in use for 365 days a year and guarantee a smooth operation of even extremely complex transmission techniques. By the time of the next JCCI in October 2022, the SBE will have been remodeled once again, the translator and technical booths relocated and a wall moved to generate an additional 40 seats.

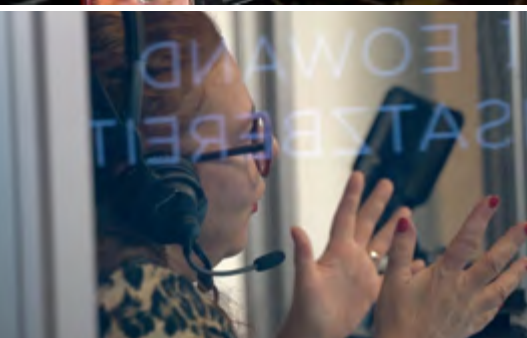

3 PARTICIPATION OPTIONS FOR MAXIMUM REACH

160 in-person participants plus 100 additional Zoom participants who can interact live in the FAQ section and an unlimited number of live streaming participants (expected: > 300) ensure a massive, simultaneous bilingual reach to all continents using the latest broadcasting technology. Also during the breaks!

15 CAMERAS - EVERYTHING IN VIEW

On the one hand, we have permanently installed, joystick-controlled high-resolution cameras installed in the lecture hall, the industrial exhibition, the courtyard, as well as in the catering and party tent and on the other hand, we have several mobile camera teams that interact with the participants. With this set-up we are able to bring this unique event home to the zoom and livestreaming participants as well.

LIVE SIMULTANEOUS TRANSLATION

The training center has two highly experienced and medically skilled simultaneous translators who have been accompanying the courses, training sessions and congresses at the SWISS BIOHEALTH EDUCATION CENTER for years and ensure an excellent translation of every moment. Each participant receives a headset upon request and can select the respective language channel.

BRILLIANT 6 M X 2.5 M LCD VIDEO WALL

Beamers were yesterday: susceptibility to interference, flickering, the need to darken and thus tempt participants to take a nap, and poor image quality have been replaced by a huge LCD screen that has brilliant resolution and colors in full daylight. In addition, without creating a shadow, the speaker can interact directly with the presentation, replacing the pointer with their hands!

Down to the last detail

The JCCI organization team stands for professionalism, smooth processes and cordiality.

The JCCI organizing team loves its job and is able to meet any challenge! Years of experience and tens of thousands of attendees have made this team arguably the best of its kind. Above all, this team has understood that the dentist, who is exposed to an enormous workload and pressure during the week, wants to experience positive emotions in a stress-free environment on the course days and make

many new like-minded friends. According to the motto „the eye eats with you“ only the finest, high-quality and healthy ingredients are used in the SBE. The catering comes from its own affiliated vegan, gluten- and sugar-free „Soul Food Vegan Café & Takeaway“.

TRANSLATOR

The two experienced simultaneous translators are located in a soundproof booth in the background and “hang” as close as possible to the speakers’ lips via loudspeakers and monitors.

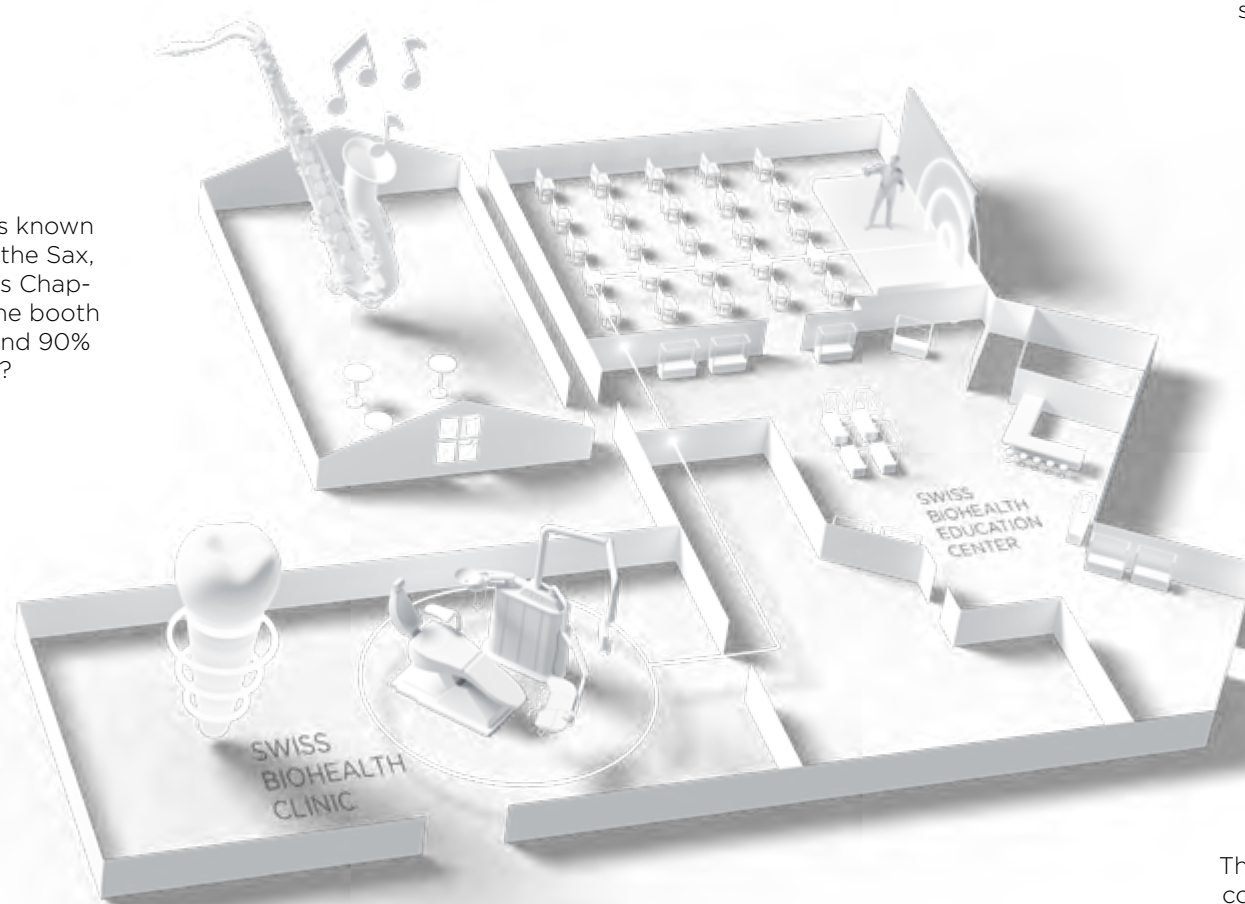

LET’S PARTY

The “WHITE-PARTY” now has a cult status known beyond the borders of the country. TomX the Sax, DJ Matt Nautique, show magician Francois Chapman and others take the attendees from the booth into another world - where else can you find 90% of the attendees on the dancefloor?

LIVE SURGERY

All 5 participating ceramic implant providers will broadcast their system and products in live surgeries from the affiliated SWISS BIOHEALTH CLINIC - in full HD via 5 different cameras.

PERFECTLY CONNECTED

The entire organizational and technical team is wired for smooth operation and can communicate with each other via two-way radio at any time.

INTERNATIONAL TOP SPEAKERS

We are bringing the industry’s top speakers to the JCCI. They will address the most current topics in ceramic implant dentistry and discuss the issues that matter most to dentists today. We took the trouble to survey you, our audience, to find out what topics you would most like to hear at the JCCI. The response to the survey was overwhelming!

CONTROL ROOM

The control room is housed in a soundproof booth outside the room and is staffed by a top competent team. The IT professionals are connected via loudspeakers and separated from the stage only by a glass wall.

INDUSTRY EXHIBITION

The most important organizations, ceramic implant companies and industry suppliers will be on site to present their latest products and information. The exhibition will provide attendees with an excellent overview of the state of the art in the industry. It also provides excellent networking opportunities in a relaxed atmosphere.

Kongress Management Team

AYLA TAVIT

MONIKA BAUERNHOFER

Dear colleagues and congress participants,
For the past 20 years, I, Ayla Tavit have been working together with Dr. Ulrich Volz and, as Chief Education Officer, manage the entire continuing education program for the JCCI and other events such as the German Congress of Sports Physicians. I have been managing and guiding participants since the very beginning and have been instrumental in turning a first continuing education course in 2015 with 12 participants into a program that now trains over 4,000 course participants annually at the SWISS BIOHEALTH EDUCATION CENTER. In my responsibility, I am supported by Monika Bauernhofer. In the courses and trainings, the participants should be given maximum knowledge and know-how, in an environment that allows them to escape from the daily routine and make new friends among like-minded people. This also guarantees a lot of fun! We look forward to seeing you in Kreuzlingen.

Entertainment factor

Culinary highlights and an exclusive entertainment program make the JCCI unforgettable

"Work Hard, Play Hard" would probably best describe the times outside of the lecture hall and industry exhibition. After attaining knowledge transfer at the highest level, the discerning participants of the JCCI events can expect an experience for all the senses. Be it culinary delicacies, music, top entertainment, good conversations, valuable new contacts or simply a round of foosball, we guarantee a memorable time. Our aim is that all participants not only go home with a toolbox filled with valuable knowledge, but also with enthusiasm and a feeling of being refreshed from the 2nd JCCI, as if they had been on vacation!

JCCI 2022 - This awaits you

In 2022, we expect over 500 visitors!

The JCCI offers you excellent opportunities to exchange ideas with like-minded colleagues from all over the world. Our attendees, exhibitors and speakers together form the perfect combination of experience, product development and expert knowledge. This year, the JCCI will again be the

largest congress of its kind with over 500 attendees, clearly demonstrating that ceramic implant dentistry is on the rise. With your participation, you can actively shape this exciting development.

Top international speakers

Our primary objective is to introduce you to the best experts in ceramic implantology from all over the world. In addition, we give you the opportunity to share with us the topics that interest you the most and that you need in your daily practice.

JCCI 2022 - Current speakers forum

After the outstanding success of the 1st JOINT CONGRESS for CERAMIC IMPLANTOLOGY we want to follow up with a new selection of top-class speakers. The trend is clear: CERAMIC IMPLANTOLOGY is future-oriented and is gaining more and more support among research-based scientists

in dentistry. And it is precisely these leading voices that we are bringing to Kreuzlingen. There are still 9 months to go until the next JCCI and the list of speakers is already taking shape!

PROF. DR. FLORIAN BEUER MME *Berlin, Germany*

Prof. Florian Beuer is currently the Director of the Department of Prosthodontics, Gerontology and Functional Dentistry at Charité Universitätsmedizin Berlin, a position he has held since 2015. He is also the President of the German Society of Implantology (DGI) since November 2021. After studying dentistry at Ludwig-Maximilians-Universität (LMU) Munich and earning his doctorate in 2002, Prof. Florian Beuer completed his habilitation in 2009. From 2002 and until 2015, Prof. Florian Beuer worked as a research associate, senior physician, and head senior physician at the Polyclinic for Dental Prosthetics at LMU. He was awarded the Sponsorship Award of the Bavarian Dental Association in 2007, the Robert Frank Award of the International Association for Dental Research in 2009, and the Research Award of the Camlog Foundation in 2012/2013.

PROF. DR. DR. DR. SHAHRAM GHANAATI, *Frankfurt, Germany*

Prof. Shahram Ghanaati is currently Deputy Director and Head Senior Physician at Frankfurt University Hospital, as well as Head of the FORM Lab and Head of the Head and Neck Tumor Center. Prof. Shahram Ghanaati holds a triple doctorate in medicine, dentistry and natural sciences (MD, DMD, PhD) from the German universities Johannes Gutenberg University, Mainz and Johann Wolfgang Goethe University, Frankfurt. Prof. Shahram Ghanaati has given more than 80 lectures at national and international congresses and has given more than 40 courses and workshops on GTR & GBR in implant dentistry as well as regenerative concepts and blood concentrates.

PROF. DR. PETER FAIRBAIRN, *London, United Kingdom*

Prof. Peter Fairbairn is a global expert on bone regeneration, with extensive published research in materials and surgical protocols for bone repair without the use of donor animal and human products. These breakthroughs have not only enabled the patients to have their own host healing for the restoration of the bone needed for dental implants but have also provided patients with a more ethical alternative. He has been working on the protocols and developing new materials for the last 16 years, and is now invited globally to speak on the topic at conferences and universities in over 30 countries. In addition to holding the position of Director of Education of the ADI (UK), Prof. Peter Fairbairn is a past president of the London Dental Fellowship.

PROF. DR. GEORGIOS E. ROMANOS, D.D.S., PH.D., *Stony Brook, USA*

Dr. Georgios Romanos is Professor of Periodontology at Stony Brook University, School of Dental Medicine and Professor of Oral Surgery and Implantology in Frankfurt, Germany. He completed his extensive specialized training in periodontology, prosthodontics and oral surgery in various institutions in Germany and New York. He has a Specialized Certificate in Oral Surgery and Implantology in Germany, a Certificate in Periodontology and AEGD (Univ. of Rochester). He is also a Diplomate of the American Board of Periodontology and the Int. College of Oral Implantology (ICOI), a former Professor and Director of Laser Sciences at NYU College of Dentistry and a former Professor of Clinical Dentistry at the Univ. of Rochester, NY. He is licensed to practice dentistry in NY State and in Europe.

Speaker Forum JCCI 2022 (cont.) :

DRS. MARKUS & MATHIAS SPERLICH,
Freiburg, Germany

Drs. Markus and Mathias Sperlich specialize in implantology and implant prosthetics in their own practice in Freiburg. They cover all implant surgical topics from ridge management to sinus floor augmentation. One focus of their implantology work is immediate treatment and immediate restoration.

PROF. DR. JAMES RUTKOWSKI, RPH, DMD, PHD, *New York, USA*

Dr. James Rutkowski is a pharmacist, dentist, and has a PhD in pharmacology. He has authored multiple publications in peer-reviewed journals and textbook chapters. He is editor-in-chief of the Journal of Oral Implantology, a Diplomate/Past-President of the American Board of Oral Implantology/Implant Dentistry (ABOI/ID), and Honored Fellow of the American Academy of Implant Dentistry (AAID). He lectures nationally and internationally on pharmacology, sedation techniques, bone grafting materials and techniques, plus methods for treating medically compromised dental patients. Prof. Rutkowski has been bestowed the Gershkoff-Goldberg Award for service to the field of Implant Dentistry and the Isiah Lew Memorial Research Award for contributions to research in the field of Implant Dentistry.

DR. ROLAND GLAUSER, *Zurich, Switzerland*

Dr. Roland Glauser graduated from the University of Zurich, where he became Assistant Professor at the Department for Fixed Prosthodontics and Dental Materials in 1997, a role he held until 2006. He is an active member of the Academy of Osseointegration (AO), the European Association for Osseointegration (EAO) and serves as a certified expert in oral implantology in the European Dental Association (EDA). His research activities mainly focus on tissue integration of oral implants and shortened clinical protocols. Dr. Glauser runs a private clinic in Zurich and holds an appointment as Clinical Associate Professor at the College of Dental Medicine, Georgia Regents University, Augusta, GA, USA.

DR. WALTER DÖRING, *Schwäbisch Hall, Germany*

Dr. Walter Döring is Managing Partner of the Academy of German World Market Leaders. He was Deputy Minister President and Minister of Economics of the State of Baden-Württemberg for eight years and Deputy Federal Chairman of the FDP. His professional career has taken Dr. Döring through various positions at state and federal political level to the supervisory boards of numerous companies and foundations. He is also still a lecturer at the Baden-Württemberg Cooperative State University in Stuttgart. Since 2012, Dr. Walter Döring has been President of the Bundesverband Deutscher Mittelstand e.V. and the European Business Forum e.V.

PROF. DR. WAEL ATT, *Boston, USA*

Dr. Att is a professor and Chair of the Department of Prosthodontics at Tufts University School of Dental Medicine. He is also a professor of prosthodontics at the School of Dentistry, University of Freiburg, Germany. Dr. Att obtained his DDS degree in 1997 from Tishreen University and received the Dr Med Dent (2003) and PhD (2010) degrees as well as the title of extraordinary professor (2013) from the University of Freiburg. He was a visiting assistant professor from 2005 to 2007 at the Weintraub Center for Reconstructive Biotechnology, UCLA School of Dentistry and the Director of Postgraduate Program in Prosthodontics in Freiburg from 2007 to 2017. A widely published and internationally respected clinician and lecturer, Dr. Att's main focus within teaching, research and clinical practice is esthetic and implant dentistry.

PROF. DR. TOMAS ALBREKTSSON, *Gothenburg, Sweden*

Prof. Tomas Albrektsson joined Per Ingvar Brånemark's team in 1967 and has since been involved in applied osseointegration research for oral, craniofacial and orthopedic implants. He received his PhD from the University of Gothenburg (MD:1975; PhD:1979 with a thesis on bone graft healing), where he was Professor and Head of the Department of Biomaterials between 1986 and 2012. Prof. Tomas Albrektsson is a visiting professor in the Department of Prosthodontics at Malmö University and a member of the Royal College of Physicians and Surgeons of Glasgow. He has given more than 1,400 lectures and published scientific and clinical papers in various peer-reviewed journals around the world.

PROF. DR. THOMAS WIEDEMANN, *New York, USA*

Prof. Thomas G. Wiedemann, MD, DDS, PhD, Clinical Assistant Professor is currently a full-time faculty member and Associate Director for Advanced Programs in Oral Surgery/Royal College of Surgeons of Ireland at New York University (NYU), College of Dentistry, Department of Oral and Maxillofacial Surgery. Prof. Thomas Wiedemann is an expert in modern concepts of alveolar ridge augmentation and reconstruction (including intraoral and extraoral autogenous bone grafts), maxillary sinus grafting surgery, bone and tissue regeneration, and CBCT and piezo surgery.
